MOHAMED AMEER A

Junior DevOps Engineer | Linux Administrator | Aws Cloud | CI/CD

Bengaluru, India 560016 | +91-9342642958 | mohamedameer1296@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with a BE in Information Science and Engineering and practical training in Linux administration, AWS, and DevOps tools. Comfortable with Linux system management, service monitoring, troubleshooting, and automation. Developed a Linux Server Health Monitoring and Auto-Recovery System using systemd services and timers to monitor system resources, maintain logs, and automate service recovery. Eager to apply my technical knowledge to cloud infrastructure, automation, and CI/CD while learning from experienced engineers.

TECHNICAL SKILLS

Cloud Platforms: AWS EC2, S3, VPC, IAM, CloudWatch, CloudTrail, Auto Scaling, Elastic Load Balancing (ELB), Route 53, RDS, DynamoDB, CloudFront, SNS, SQS

Linux Administration: RHEL, CentOS, Ubuntu, User and Group Management, File Permissions and Ownership, Package Management (RPM, YUM/DNF), Process and Service Management (ps, top, systemctl), Disk and Filesystem Management, Cron Job Scheduling, SSH, Apache, Firewall Configuration, Linux Server Migration

DevOps Tools: Git, GitHub, Jenkins, Docker, Kubernetes, Ansible, Terraform

Programming Languages: Python

Web Technologies: HTML5,CSS3,Bootstrap, Material UI (MUI)

Tools & Utilities: VS Code, VMware Workstation, PuTTY

CERTIFICATIONS & TRAINING

- Cloud Computing Master Program — Besant Technologies
- Linux System Administration Training — Besant Technologies
- VTU Skill Enhancement Program

WORK EXPERIENCE

Computer Education Tutor| G-TEC Computer Education, Rajapalayam — Dec 2025 – Jun 2026

- Conducted computer classes and practical training sessions, covering computer applications and technical concepts.
- Prepared instructional materials, assessed student progress, and provided individual guidance to support learning outcomes.

PROJECTS

Linux Server Health Monitoring and Auto-Recovery System | CentOS Stream 10

- Created a script to monitor system memory and disk usage and save server health details in log files.Set up systemd services and timers to run regular health checks and automate service recovery tasks.Simulated service failures using a test service and checked system logs to verify that recovery worked as expected.

RHEL 8 to RHEL 9 Migration

- Performed a RHEL 8 to RHEL 9 migration, reviewed system configurations and installed packages, verified service functionality after migration, and documented the migration process and technical steps involved.

EDUCATION

Bachelor of Engineering — Information Science and Engineering — 2021 – 2025

New Horizon College of Engineering, Bengaluru | CGPA: 7.40 / 10

Higher Secondary Education | M.K.V.K School, Tenkasi — 2019 – 2021
